

Case Study #2

- **Ciba Geigy Superfund Site, Toms River, NJ**
- **Plume exceeds five square miles**
- **Over 50 recovery wells**
- **Many miles of transmission pipeline**
- **System involves groundwater recovery, pumping to central location, precipitation of inorganics followed by activated carbon adsorption**
- **Pump rebuilding was costing about \$200,000 annually**
- **Since 1999, Redux has provided systems for 20 different recovery pump and associated pipelines**

Extension of Cleaning Cycle: Ciba Geigy – Well 292
